The ABA Antitrust Section's Unilateral Conduct Committee presents a Committee Program on *Remedies in Monopolization Cases*.

The program will explore the thorny question of remedies for single firm anticompetitive conduct, including the structural, behavioral and damages remedies, from the EU and US perspectives. Our panelists will also explore the efficacy of remedies in high tech and other innovative industries. In addition, the program will also explore the very difficult issue of remedies in cases involving pricing conduct, intellectual property rights, and refusals to deal.

Please join our expert panel for what promises to be a very lively discussion.

Speakers: **Robert W. Crandall** is a Nonresident Senior Fellow in the Economic Studies Program at the **Brookings Institution**, Washington, DC.
