State of Maryland
Absentee Ballot Log

The election office will record the serial number range/ number of absentee ballots issued for each facility. The team designated to pick up supplies must verify that the serial number range/number of ballots recorded on this log matches the serial number range/number of the ballots and initial in the appropriate column. When the supplies are returned to the election office, the election office will record the serial number range/number of the returned, unvoted ballots. The team designated to return the supplies must verify and initial in the appropriate column the serial number range. number of the returned, unvoted ballots.

Note to LBEs: If you do not issue absentee ballots with serial numbers, you may remove the columns referencing serial numbers. The teams will be verifying the number of ballots issued and returned.

Facility Name/No.	Ballots Issued Serial Number Range		Number of Ballots Issued	Verified by Team?	Returned Unvoted Ballots Serial Number Range		Number of Ballots Returned	Verified by Team?
