Dear Readers:

As many of you know, *Jurimetrics* is published quarterly by the ABA’s Science and Technology Law Section. It is edited by a dedicated team of students, faculty, and staff at the Sandra Day O’Connor College of Law. The journal is dedicated to publishing quality articles addressing the intersection of law, science, and technology.

As the new faculty editor for *Jurimetrics*, I would like to encourage all of you, especially the practitioners out there, to submit articles to the journal. Those of you in practice are often closest to what is happening in business transactions, the courts, and the regulatory process. Your experiences and insights are extremely valuable, and I would urge you to consider sharing them with the readers of *Jurimetrics*. Writing an article allows you to delve deeper into topics than practice sometimes permits, while at the same time looking more broadly at the issues you encounter.

I would also like to introduce a new feature we are implementing with this issue, entitled “SciTech Corner.” Not every idea is worthy of a full-length article. Nor will every reader have the time to digest full-length articles to get at important ideas contained therein. SciTech Corner will present in short form commentary on recent developments, concise discussions of longer works, and similar pieces that we believe will be of use to you. Our first entry is by Professor David Kaye, discussing the use of statistical evidence and permissible testimony about it in *State v. Wright*, a recent Montana Supreme Court case. If you feel that you just don’t have an article in you, we encourage you to submit something for this feature.

Finally, if you have ideas for symposia or articles that you would like to read, please let us know. We’re all ears.

Thank you, and we look forward to hearing from you.

December 2011
Adam S. Chodorow
Professor of Law and Faculty Fellow
Center for Law, Science & Innovation
*Jurimetrics* Faculty Editor
