

INTRODUCTION

Is It *Really* Possible To Run a Law Practice on a Mac?

We get this question a lot: “Is it *really* possible to run a law practice on a Mac?”

The short answer is “*Yes!*”

But like many things in this life, the longer answer involves a bit of “it depends” and different decisions based on your specific practice.

In this book, our goal is to guide you through all those decisions so that you can properly determine if you can run *YOUR* law practice on a Mac.

While we both resolutely believe that Macs are an excellent computing platform for lawyers, we are similarly resolved that they’re not the best choice for every lawyer and law practice.

But if you’ve ever wondered whether a Mac might be a good fit for what you do every day, then this book will help you determine the answer.
