SECTION 1: INTRODUCTION TO UNMANNED AIRCRAFT TECHNOLOGY AND LAW

1 Introduction to Unmanned Aircraft Law
   Donna A. Dulo 3

2 A Brief History of Unmanned Aircraft
   Jonathan B. Rupprecht and Donna A. Dulo 9
   The Early Historical Utilization of Unmanned Aircraft 11
   Unmanned Aircraft as a Weapon 12
   Unmanned Aircraft Providing Realistic Target Practice for Military Training 15
   Unmanned Aircraft as Military Decoys 16
   Unmanned Aircraft for Aerodynamic Research and Development 17
   Unmanned Aircraft Gathering Data 18
   Unmanned Aircraft for Recreation 18
   Unmanned Aircraft Taxonomy 19
   Conclusion 20

3 Aeronautical Foundations of the Unmanned Aircraft
   Donna A. Dulo 21
   Manned vs. Unmanned Technologies 23
   Types of Unmanned Aerial Systems 26
      FAA Operational Categories 27
      UAS Airframe Technologies 29
      UAS Size Categorizations 36
   Conclusion 39
SECTION 2: FAA RULEMAKING AND UNMANNED AIRCRAFT LAW

4 The Federal Aviation Administration Rulemaking Process

Jonathan B. Rupprecht

The FAA Is Authorized to Create Regulations

What Is Subject to the Rulemaking Process?

What Are the Laws Governing the Rulemaking Process?

Legislation Affecting the Rulemaking Process

Executive Orders

The Office of Management and Budget

The Department of Transportation

FAA Regulations, Orders, Notices, and Policy Statements on the Rulemaking Process

What Does the FAA Rulemaking Process Look Like

The FAA Has to Be Informed of a Problem

The FAA Finds the Solution to the Problem

The FAA Can Create a Committee to Give Advice on an Issue

The FAA Can Use Private Organizations to Help Find a Solution

Solving the Problem by Changing the Classification

The FAA Works Alongside International Regulatory Bodies

What Happens Inside the FAA Before a Notice Is Published

The FAA Must Publish a Notice of Proposed Rulemaking

The FAA Must Wait for Federal Register Comments

The FAA Must Consider the Comments

The FAA Publishes the Final Rule

Where Will the FAA Put the New Regulation and What Number Should the Regulation Be?

Other Rulemaking Scenarios

Formal Rulemaking

Direct Final Rulemaking

When Notice and Comment Is Impracticable

When Notice and Comment Is Unnecessary

When Notice and Comment Are Contrary to the Public Interest

Negotiated Rulemaking

Persons Can Petition the FAA to Repeal the Rule
5 Unmanned Aircraft in the National Airspace  
Cameron R. Cloar  
History of the National Airspace System and the Regulatory Environment  
Questions of Early Authority  
The Jet Age and Beyond  
A Note on International Law and the Chicago Convention  
Laws and Regulations That Define Today’s Complex National Airspace System  
The Federal Aviation Act  
Enforcing the Rules and Regulations of the National Airspace System  
The Federal Aviation Regulations  
Aircraft and Component Part Designers and Manufacturers  
General Operating Rules  
Airmen, Mechanics, and Other Individuals Operating within the National Airspace System  
Physical Contours of the National Airspace System  
Limitations on Regulation of the Current National Airspace System with New UAS Technology  
Conclusion

6 Grounded in the Law  
Timothy M. Ravich  
Common Law and the Constitution in the Unmanned Aircraft Age  
Traditional Tort Principles and Early Unmanned Aviation  
The National Airspace System: Constitutional Gravity  
Paths Forward, or Into, the Amazon: R/C Models, COAs, SAC-EC, and Section 333  
UAVs versus “Model Airplanes”  
FAA Modernization and Reform Act of 2012  
Certificate of Authorization or Waiver (COA)  
The “333” Exemption  
Conclusion
7 Considerations of a Legal Framework for the Safe and Resilient Operation of Civilian Autonomous Unmanned Aircraft

Donna A. Dulo and Cameron R. Cloar

The Modernization and Reform Act of 2012

The Impact of Unmanned Technology on Legislation

Much of the Current Regulatory Structure and Liability Frameworks Are Ill-Suited for Autonomous UAS Technology

The UAS Autonomy Spectrum

Pilot Control

Autonomous Control

Migrating from Pilot to Autonomous Control

Voluntary Autonomy

Involuntary Autonomy

UAS Autonomy Spectrum as a Guide for a Legal Framework

Broad Considerations that Should Be Taken into Account in Any Legal Structure for Autonomous UAS

Human-Systems Interdependence Considerations

Uncommanded/Involuntary Autonomy Considerations

Sense-and-Avoid Considerations

Malicious Control Considerations

Regulatory Considerations

Conclusion

SECTION 3: UNMANNED AIRCRAFT SAFETY, SECURITY, AND INFORMATION ASSURANCE REGULATION AND TECHNOLOGY IN THE NATIONAL CRITICAL INFRASTRUCTURE

8 Information Assurance, Cybersecurity, and Legislation Relating to Unmanned Aircraft in the National Critical Infrastructure

Donna A. Dulo

United States Critical Infrastructure Legislation

Presidential Decision Directive 63

The Critical Infrastructures Protection Act of 2001

National Strategy for the Physical Protection of Critical Infrastructures and Key Assets

Presidential Policy Directive 21

National Infrastructure Protection Plan
Homeland Security Presidential Directive 7 and the Transportation Sector Specific Plan 158
The Information Technology Sector Specific Plan 161
The Communications Sector Specific Plan 163
Conclusion 164

9 Technological Context of Cybersecurity and Unmanned Aircraft in the National Critical Infrastructure 165

Donna A. Dulo

The CIA Triad and Unmanned Aircraft Information Assurance 166
The Difference Between ICS Security and General Information Assurance 170
Unmanned Aircraft and Industrial Control System Attacks 174
Unmanned Aircraft Control Systems Attack Vectors 175
Defending Unmanned Aircraft Industrial Control Systems through Offensive and Defensive Postures 176
Defensive Posture: Defense-in-Depth 176
Defense-in-Depth Strategy and Structure 180
Defense-in-Depth Defensive Posture Conclusion 183
Offensive Posture: Cyber Deterrence 183
Deterrence Basics 184
Retaliatory Deterrence 185
Deterrence Disadvantages 186
Coordination of Private Sector and Government 187
Deterrence Conclusion 187
Defending Unmanned Aircraft Industrial Control Systems through Offensive and Defensive Postures Conclusion 188
Conclusion 188

SECTION 4: CONSTITUTIONAL ISSUES OF UNMANNED AIRCRAFT IN THE NATIONAL AIRSPACE 189

10 Unmanned Aircraft and the Media 191

Donna A. Dulo

The First Amendment and Freedom of the Press 194
The Federal Regulatory Authority 194
The Non-Absolute Rights of the First Amendment 196
The First Amendment as the Court’s Last Resort 199
Current State of First Amendment Unmanned Aircraft Cases 200
The Fourth Amendment and Joint Action 202
The Fourth Amendment Liability of the Media 205
Current State of Fourth Amendment Unmanned Aircraft-Related Cases 207
Huerta v. Pirker 212
Forging a Technological Legal Framework for UA Operations 216
Aerial Vantage Point in Navigable Airspace 216
Payload Factors 218
The Overall Framework 220
Summary and Conclusions 221

11 Sensing and Surveillance 225
Hillary B. Farber
Unmanned Aircraft Capabilities 228
Federal and State Legislative Activity 230
Aerial Surveillance and Current Fourth Amendment Jurisprudence 233
Recommendations 240
Conclusion 242

12 Civilian Weapons on Unmanned Aircraft 243
Christine L. Keyzers
Second Amendment Key Rulings 244
Weapons and Unmanned Aircraft 247
Examples of Civilian Unmanned Aircraft with Weapons 248
Conclusion 250

SECTION 5: UNMANNED AIRCRAFT RISK, PRODUCT LIABILITY, AND INSURANCE 251

13 Unmanned Aircraft Product Liability and Risk Management 253
Stephen S. Wu
Reasons Product Liability Suits Occur 255
Potential Impacts of Accidents 259
Claims and Defenses in Unmanned Aircraft Product Liability Cases 262
Strict Liability Claims 262

14 Issues of Unmanned Aircraft Insurance and Insurance Underwriting      | 287|

*David K. Beyer and Gale A. Townsley*

Limiting Risk of Liability and Damages Exposure Through the Purchase of Insurance | 288
Where to Start—Identifying Key Risks                                        | 288
Unmanned Aircraft Insurance Overview                                         | 290
Market Overview                                                             | 291
Coverages and Underwriting Practices                                         | 292
Commercial Unmanned Aircraft Liability Coverage Scope                       | 292
Unique Commercial Unmanned Aircraft Data Privacy and Cyber Risk Issues       | 293
Coverage                                                                    | 293
The Data                                                                    | 293
The Cloud                                                                   | 294
Cloud Architecture                                                          | 296
Underwriting                                                                 | 297
The Future: A Possible Alternative Model for Unmanned Aircraft Coverage     | 298

15 Risk, Product Liability Trends, and Insurance in Commercial Unmanned Aircraft | 301

*David K. Beyer, Donna A. Dulo, Gale A. Townsley, and Stephen S. Wu*

The Future Pervasiveness and Risk Challenges of Unmanned Aerial Systems      | 303
A Formal Unmanned Systems Mishap Study                                      | 304
### CONTENTS

- Results of the Air Force Study 305
- Study Conclusions 309
- Product Liability Implications of the Air Force Study 310
  - U.S. Product Liability Law as Related to the Study 310
  - The Strict Liability Cause of Action 311
  - The Negligence Cause of Action 313
  - Breach of Warranty Causes of Action 314
  - Statutory Causes of Action 314
  - Defense Based on the Conduct of the Plaintiff 315
- Application of U.S. Product Liability Law to the Results of the Air Force Study 315
- Conclusions Concerning Application of U.S. Product Liability Law to the Results of the Air Force Study 317
- Insurance Underwriting Implications of the Air Force Study 317
  - Property Damage 318
  - Liability 318
  - Unmanned Aircraft Manufacturer Liability Insurance Coverage 318
- Conclusion 319
- Table of Cases 321
- Statutes and Laws 325
- Index 333
