About the Authors of *Mirandized Statements*

**Richard Rogers, Ph.D., ABPP,** is Regents Professor of Psychology at the University of North Texas. For the last decade, Dr. Rogers has been a principal investigator on grants from the National Science Foundation that systematically study Miranda warnings and waivers. Based on this research, Rogers and his colleagues developed the Standardized Assessment of Miranda Abilities (SAMA)—psychological measures for use by forensic psychologists and psychiatrists for evaluating the validity of Miranda waivers. Dr. Rogers is nationally recognized for his contributions to forensic psychology and psychiatry, with awards from the American Academy of Forensic Psychology, the American Psychiatric Association, and the American Academy of Psychiatry and Law. Dr. Rogers recently became only the third psychologist in the history of the American Psychological Association to receive Distinguished Professional Contributions Awards in both Applied Research (2008) and Public Policy (2011). He serves as an expert consultant on a broad range of criminal forensic issues.

**Eric Drogin, J.D., Ph.D., ABPP,** is an attorney and forensic psychologist serving on the faculties of the Harvard Medical School, the Harvard Longwood Psychiatry Residency Training Program, and the Harvard Law School Trial Advocacy Workshops. Dr. Drogin has occupied such additional roles as Commissioner of the American Bar Association’s Commission on Mental & Physical Disability Law, Chair of the American Bar Association’s Section of Science & Technology Law, Chair of the American Psychological Association’s Committee on Legal Issues, Chair of the American Psychological Association’s Committee on Professional Practice & Standards, and President of the American Board of Forensic Psychology. He serves as an expert consultant on a broad range of criminal forensic issues.
