CONTENTS

About the Authors ......................................................... ix
Acknowledgments ......................................................... xiii

CHAPTER 1: Climate Change and Insurance: An Overview ................. 1
  A. Potential Exposures .................................................. 2
     1. Potential Enterprise Liability ........................................ 2
     2. Potential Claims Liability ............................................ 3
  B. Implications by Coverage Type ....................................... 4
  C. Risk Management and Product Development Considerations .......... 8
     1. Potential Enterprise Liability ........................................ 8
     2. Potential Claims Liability ............................................ 9

CHAPTER 2: Climate Change, Global Warming, and Greenhouse Gases:
  Background ..................................................................... 11
  A. Defining “Global Warming” and “Climate Change” .................... 11
  B. The Importance of Definitions in the Insurance Context ............ 13
  C. Greenhouse Gases and the Causation Issue ........................... 14
  D. Greenhouse Gases (GHGs) ............................................ 16
  E. Conclusion .................................................................... 20

CHAPTER 3: Climate Change as an Emerging Risk and Comparison
  to Historic Emerging Risks .................................................. 21
  A. Climate Change as an Emerging Risk .................................. 21
  B. Evolution of Other Emerging Risks ................................. 22

CHAPTER 4: The Likely Plaintiffs and Targets of Emerging Climate
  Change-Related Litigation and Regulation ................................ 25
  A. Potential Impacts and Likely Claimants .............................. 25
  B. Targets/Defendants ...................................................... 26
     1. Emitters of GHGs ....................................................... 26
     2. Service Providers to Targeted Emitters ............................ 30
     3. Impact to Insurers ...................................................... 31
CHAPTER 5: Existing and Emerging Climate Change-Related Regulation . . . 33
A. The International Backdrop .............................................................. 34
B. National Regulation ........................................................................ 38
   1. EPA Action Pursuant to the Clean Air Act ................................. 38
      a. Massachusetts v. EPA ................................................................. 39
      b. EPA Endangerment and Cause or Contribute
         Findings for GHGs .................................................................. 40
   2. EPA and NHTSA Light-Duty Vehicle GHG Standards
      and Corporate Average Fuel Economy Standards (“Tailpipe Rule”) . . 43
   3. EPA Timing Rule ......................................................................... 44
   4. EPA’s GHG Reporting Rule ........................................................... 45
   5. EPA Prevention of Significant Deterioration and Title V
      Greenhouse Gas Tailoring Rule ...................................................... 46
   6. Standards of Performance for Carbon Dioxide Emissions
      for New Stationary Sources: Electric Utility Generating Units ........ 50
   7. Potential Impact of Emerging Clean Air Act Regulation
      on Climate Change-Related Litigation ......................................... 51
C. Congressional Action ...................................................................... 51
D. Regulation and Potential Litigation Related to Carbon Storage ......... 52
E. Renewable Energy: An Overview ....................................................... 53
F. State and Local Regulation ............................................................... 56
G. Regional Agreements ...................................................................... 59
H. State Insurance Regulation ............................................................... 61
   1. The National Association of Insurance Commissioners (NAIC) ...... 61
      a. NAIC Climate Risk Disclosure Survey ...................................... 62
      b. 2011 Ceres Report on 2010 NAIC Survey Results ................... 63
      c. Recent NAIC Activities ............................................................ 65
      d. California, New York, and Washington Mandatory Survey ....... 66
   2. California Green Insurance Act of 2010 ...................................... 66
   3. Pay-As-You-Drive Regulations ...................................................... 67

CHAPTER 6: Climate Change-Related Litigation ................................. 69
A. Common Law Tort Litigation ............................................................ 70
   1. Climate Change-Related Tort Litigation: An Overview .............. 70
   3. Kivalina v. ExxonMobil Corp. ...................................................... 76
   4. California v. General Motors Corp. .............................................. 80
5. Tort Litigation Related to Episodic Climatic Events .................. 81
   a. *Turner v. Murphy Oil USA, Inc.* ................................................. 81
   b. *Comer v. Murphy Oil USA, Inc.* ................................................. 82
6. Future Trends: Climate Change-Related Tort Litigation ................. 87
   a. Additional Types of Claims Including Products Liability ............ 87
   b. The Causation Issue ................................................................. 88
   c. Foreseeability ........................................................................... 91

B. Climate Change-Related Insurance Coverage Litigation:
   An Introduction to *AES Corp. v. Steadfast Insurance Co.* ............... 92
C. Public Trust Litigation ................................................................. 93
D. Claims for Natural Resource Damages Pursuant to CERCLA .......... 95
E. Claims Arising out of Corporate Disclosure and Management
   of Climate Change Risk ................................................................. 97
   1. Shareholder Resolutions Related to Climate Change .................... 98
   2. Potential Litigation Related to Misrepresentation, Concealment,
      or Mismanagement of Climate Change Risk ............................... 102
   3. Role of the SEC in Climate Risk Disclosure ................................. 102
      a. Background: Petitions to the SEC for Further Regulation
         of Climate Change Risk Disclosure .......................................... 102
      b. Current Securities Laws, Regulations, and Guidance
         Requiring Disclosure of Climate-Change Issues ...................... 104
4. Climate Change-Related Activity in New York Pursuant
   to the Martin Act ........................................................................... 106
5. Voluntary Climate Change Disclosure Programs ............................. 108
   a. Carbon Disclosure Project ......................................................... 108
   b. Principles for Responsible Investment ....................................... 110
   c. Dow Jones Sustainability Index ............................................... 111
   d. FTSE4Good Index Series .......................................................... 112
   e. The Climate Registry ............................................................... 114
   f. Periodic Stakeholder Reporting (Annual Reports) ....................... 115
F. Potential Litigation Arising out of Efforts to Address Climate
   Change Issues ............................................................................... 115
   1. Utilization of the National Environmental Policy Act (NEPA)
      and State Environmental Policy Acts (SEPAs) to Address
      Climate Change .......................................................................... 115
      a. National Environmental Policy Act (NEPA) ............................. 115
      b. State Environmental Policy Acts (SEPAs) ................................. 117
      c. Implications ........................................................................... 119
2. Disputes Arising out of Carbon and GHG Markets .......... 120
3. Greenwashing Litigation ........................................ 122
   a. Greenwashing and Consumer Actions Related
to Misleading or False Advertising .......................... 123
   b. Federal Trade Commission Focus on “Green” Marketing ... 128
4. Green Building Litigation ..................................... 129
   a. Green Building Standards .................................. 130
   b. Litigation Resulting from Governmental Legislation and Regulation ............................. 131
   c. Contractual and Other Disputes ......................... 132
G. Potential GHG-Related Enforcement Actions .............. 134

CHAPTER 7: Intersection of Climate Change and Insurance ....... 135

A. Existing and Emerging Climate Change-Related Exposure
   Arising out of First- and Third-Party Coverage of Insureds
   (“Potential Claims Liability”) .................................. 135
   1. Overview of Potential Claims Liability ................. 135
   2. First-Party Coverage ....................................... 136
      a. Implications for Property Coverage ................. 136
      b. Implications for Property (Time Element) Coverage 136
   3. Third-Party Coverage ....................................... 138
      a. Implications for D&O Coverage ....................... 138
      b. Implications for Commercial General Liability Coverage ... 141
      c. Implications for Environmental Liability Coverage ... 143
      d. Implications for Professional Liability/E&O Coverage ... 144
      e. Implications for Contractor’s Protective Professional
         Indemnity and Liability Insurance and Owner’s Protective
         Professional Indemnity Insurance .................... 145
   4. Potential for Bad Faith Claims ............................. 146
      a. Bad Faith Claims Based on Inconsistent Position on Climate
         Change-Related Issues .................................... 146
      b. Bad Faith Claims Based on Denial of Coverage ........ 146
B. Emerging Climate Change-Related Exposure: Potential
   Enterprise Liability ........................................... 147
   1. Potential Liability Based on Corporate Disclosures ........ 147
   2. Potential Liability Related to Provision of Loss Control
      Consulting Services ......................................... 148
C. New Applications of Existing Coverages and New Products.............. 148
   1. Traditional Insurance Products for Renewable Energy Projects....... 149
      a. Property Insurance........................................... 149
      b. Boiler and Machinery Insurance............................ 150
      c. Commercial General Liability Insurance.................... 151

CHAPTER 8: Potential Claims Liability: Potential Exposure Drivers ...... 153
A. Claims-Made and Reported.............................................. 154
   1. The Claim Must Be Made During the Policy Period
      or Extended Reporting Period.................................... 155
   2. The Retroactive Date Requirement................................ 156
B. Occurrence-Based.......................................................... 156
   1. AES Corp. v. Steadfast Insurance Co............................... 156
   2. Cinergy Corp. v. Associated Electric & Gas Insurance Services, Ltd.:
      Damages Not Caused by An Occurrence.......................... 159
   3. The Effect of the “Trigger” on Occurrence........................ 160
      a. Exposure......................................................... 161
      b. Manifestation.................................................. 161
      c. Injury-in-Fact.................................................. 162
      d. Continuous.................................................... 163
   4. Long-Tail Claims.......................................................... 164
C. Pollution Exclusions and Grants of Pollution Coverage................. 164
   1. Definition of “Pollutant”............................................. 164
      a. The Interpretation of the Term “Pollutant”.................... 165
      b. Whether GHGs Are Pollutants.................................. 167
   2. Pollution Exclusion..................................................... 170
      a. The Three Types of Pollution Exclusions...................... 171
      b. Time Element, Limited-Pollution Coverage Endorsements...... 177
      c. Special Issues Associated with Pollution Exclusions
         in the D&O Context............................................ 178
   3. Grants of Pollution Coverage........................................ 179
D. Other Potentially Relevant Exclusions..................................... 180
   1. Bodily Injury and Property Damage Exclusion in D&O Policies...... 180
   2. Expected or Intended Injury Exclusion................................ 181
   3. Known Loss, Known Injury or Damage, Loss in Progress Clauses.... 183
   4. Preexisting Conditions Exclusion.................................... 185
5. Injunctive Relief Exclusion ........................................ 186
6. Maintenance/Betterment Exclusions ............................. 187
7. Punitive, Treble, Exemplary, or Multiple Damages Exclusion ... 187
8. Fines, Penalties, and Taxes Exclusion ............................ 188
9. Intentional/Criminal Act Exclusions .............................. 189
E. Limitations ............................................................ 191
   1. Defense Within or Outside of Limits ............................ 191
   2. Batch Clauses/Multiple Claim Clauses .......................... 191
   3. Anti-Stacking Clauses ............................................. 192
F. General Conditions: Notice Requirement ......................... 193
G. Will Exposure Drivers Result in Exposure? ...................... 194

Glossary of Acronyms & Terms ........................................ 197
Index .............................................................................. 225
