## CONTENTS

*Foreword* ............................................................................................................................... xiii  
*Preface* ..................................................................................................................................... xv  

**Chapter I**

**Introduction** ............................................................................................................................ 1  

A. Overview of Intellectual Property and Antitrust Law ................. 1  
   1. Nature of the Intellectual Property Laws ......................... 1  
      a. Patents ............................................................................ 3  
      b. Copyrights ..................................................................... 10  
   2. Nature of the Antitrust Laws ............................................ 16  
      a. Social Welfare and Consumer Welfare......................... 16  
         (1) Implications of Welfare Tests for Antitrust  
             and Intellectual Property Analysis ....................... 16  
      b. The Central Role of Market Power in Antitrust  
         Analysis ........................................................................ 18  
         (1) The Definition of Market Power ......................... 18  
         (2) Market Power and Market Structure ................... 20  
      c. Types of Conduct Subject to Antitrust Scrutiny ............ 24  
         (1) Concerted Action: Agreements that  
             Unreasonably Restrain Trade ................................. 24  
             (A) Per Se vs. Rule of Reason .............................. 25  
         (2) Unilateral Action: Exclusionary Conduct ............. 28  
         (3) Mergers .............................................................. 32  
             (A) Applicable Statutes ......................................... 32  
             (B) General Overview of Merger Concerns ........... 33  
      d. Enforcement of Antitrust Laws ................................. 35  
         (1) Federal and State Governmental  
             Enforcement .................................................................. 35  
             (A) Criminal Enforcement by the  
                 Department of Justice ....................................... 35  
             (B) Civil Enforcement by the Department of  
                 Justice and Federal Trade Commission ............... 36  
             (C) Business Review Letters and Advisory  
                 Opinions ............................................................. 37  
             (D) Civil and Criminal Enforcement by the  
                 States ..................................................................... 38  
         (2) Private Antitrust Litigation .................................... 39  

3. The Interface Between Intellectual Property and Antitrust Laws .............................................................. 40
   a. Patent Hold-Up .................................................................. 46
   b. Patent Accumulation .................................................... 49
   c. Patent Assertion Entities .............................................. 50
   d. Pay-for-Delay Settlements in Pharmaceutical Litigation................................................................. 51

Chapter II
Antitrust Analysis Of Intellectual Property

A. General Antitrust Principles Applied to Intellectual Property Agreements .................................................. 53
   1. Distinguishing Between Vertical and Horizontal Arrangements .......................................................... 55
   2. Agency Enforcement Policies ............................................ 59
      a. Promoting Innovation and Enhancing Consumer Welfare ................................................................. 61
      b. Market Power .................................................................. 62
      c. Procompetitive Benefits of Licensing ......................... 63
      d. Analysis Focused on Likely Effects ............................ 64
      e. Markets Affected by Licensing Arrangements:
         Goods, Technology, and Innovation Markets .............. 64
      f. Modes of Analysis and Framework for Evaluating Licensing Restraints ........................................ 66
      g. The Agencies’ Evaluation of Licensing Arrangements Under the Rule of Reason ............................ 68
      h. Efficiencies and Justifications ........................................ 70
      i. Antitrust “Safety Zone” .................................................. 71
   3. Evidentiary Burdens and Presumptions ................................ 73

B. Licensing Restraints That Raise Antitrust Issues .............. 76
   1. Price and Output Restraints ............................................. 76
   2. Territorial Restrictions .................................................... 80
   3. Customer Restrictions ..................................................... 84
   4. Field-of-Use Restrictions ................................................. 85
   5. Veto Rights on Additional Licenses/Sublicenses .......... 89
   6. Exclusivity in Licensing Arrangements ......................... 94
      a. Exclusive Licensing .................................................. 94
      b. Exclusive Dealing .................................................... 97
   7. Tying ............................................................................. 102
Contents

a. The Erosion and Demise of the Historical Presumption of Market Power in Tying Claims Involving Patents ................................................................. 106
b. The Agencies’ Approach to Intellectual Property Tying Claims ............................................................................... 108
c. Technological Integration as Tying .................................... 108

8. Package Licensing ............................................................... 112

9. Royalty-Related Restrictions ................................................. 118
   a. Royalties Based on Total Sales or Sales of Noninfringing Goods ........................................................................ 119
   b. Preissuance Royalties .................................................. 122
   c. Double Royalties and Exhaustion .................................. 123
   d. Discriminatory Royalties ............................................. 124
   e. Postexpiration Royalties ............................................. 132

10. Grantbacks ..................................................................... 136

11. Non-Assert Clauses .......................................................... 142

12. No-Challenge Clauses ...................................................... 144

   a. Antitrust Statutes Implicated by Cross-Licenses and Patent Pools; Applicable Legal Standards ....................... 148
      (1) The Nature of the Intellectual Property Involved ......................................................................................... 151
         (A) “Blocking” Patents ............................................. 151
         (B) Complementary Patents .................................. 152
         (C) Essential Patents ........................................... 153
      (2) Market Power of Licensors .................................. 155
      (3) Exclusivity ........................................................... 156
      (4) Price Restrictions ............................................... 156
   c. Other Antitrust Implications of Cross-Licenses and Patent Pools .......................................................... 157
      (1) Tying Intellectual Property .................................. 157
      (2) Restrictions That Impede Innovation .................. 158
      (3) Dispute Settlements ............................................. 159

C. Settlements of Intellectual Property Disputes .................. 160
   1. The Hatch-Waxman Act .................................................. 160
   2. The Circuit Split and the Supreme Court’s Actavis Decision .......................................................... 162
   3. Possible Noerr Immunity for Court-Approved Settlements .......................................................... 166
Chapter III
Antitrust Analysis of Unilateral Conduct by
Intellectual Property Owners ..................................................... 171

A. Refusal to License or Sell Intellectual Property ..................... 171
   1. Antitrust Liability for Refusing to Deal with
      Competitors: Aspen Skiing and Trinko............................... 171
   2. The Circuit Split Regarding Antitrust Liability for
      Refusing to License or Sell Intellectual Property............. 176
      a. Early Cases: SCM and Miller Insituform .................... 176
      b. Broader Scope of Antitrust Immunity for
         Unilateral Refusals to License: Independent
         Service Organizations ................................................ 177
      c. Rebuttable Presumption of Antitrust Immunity:
         Data General ............................................................. 178
      d. Presumption of Antitrust Immunity, Rebuttable
         by Showing Anticompetitive Intent: Kodak II............ 180
   3. Antitrust Immunity Doctrines After Trinko ..................... 181
   4. Obligations to License Standard-Essential
      Intellectual Property on a FRAND Basis ......................... 183
      a. FRAND Obligation as a Condition of
         Participation in Standard-Setting Organizations........... 185
      b. Implications of FRAND Obligations for
         Intellectual Property Essential to the Standard .......... 188
            (1) Enforceability of RAND/FRAND
            Obligations .......................................................... 188
            (2) FRAND Obligations as an Impediment to
            Injunctive Relief .................................................. 190
      c. Deceptive Conduct Towards SSOs............................... 195
      d. Issues in Establishing “Reasonable” and “Fair”
         Price and Other Terms ............................................... 198

B. Unilateral Enforcement of Intellectual Property Rights ...... 201
   1. Walker Process Claims................................................. 201
      a. The Walker Process Decision....................................... 201
      b. Walker Process Cases in Practice .............................. 203
      c. The Elements of a Walker Process Fraud Case .......... 206
         (1) The “Fraud” Elements ........................................... 207
            (A) Materiality .................................................. 207
            (B) Falsity ......................................................... 209
            (C) Intent to Deceive ............................................ 210
            (D) Justifiable Reliance by the Party
            Deceived .......................................................... 216
## Contents

(E) Injury to the Party Deceived by the Fraud ........................................................................ 217
(2) The Antitrust Elements ................................................................................................. 217
(A) Predatory or Exclusionary Conduct .............................................................................. 217
(B) Market Power ................................................................................................................ 220
(C) Standing/Antitrust Injury ............................................................................................... 221

2. Liability for Concealing Intellectual Property from Standard-Setting Bodies .................. 226

3. Noerr-Pennington Immunity .......................................................................................... 230
   a. The Scope of Noerr-Pennington Immunity for Litigation ................................................. 232
   b. The Scope of Noerr-Pennington Immunity for Pre-Litigation Activities ......................... 233
   c. The Scope of Noerr-Pennington Immunity with Regard to Other Petitioning Arising in the Intellectual Property Context .................................................. 239

4. Sham Litigation Exception to Noerr-Pennington Immunity ............................................. 240
   a. Are Walker Process Antitrust Claims Subject to the Professional Real Estate Test? .......... 243
   b. Establishing Objective Baselessness .............................................................................. 246
   c. Establishing Subjective Baselessness ............................................................................ 255
   d. Patterns of “Automatic” Petitioning ................................................................................ 256

5. Practical Issues in Walker Process and Sham Litigation Cases .......................................... 260
   a. Heightened Pleading Standards in Walker Process Cases .............................................. 260
   b. Pleading Issues Relating to Noerr-Pennington ............................................................... 261
   c. Statute of Limitations .................................................................................................... 263
   d. Attorney-Client Privilege and Work-Product Protection ................................................. 264

### Chapter IV

**Antitrust Issues in Transactions Involving Intellectual Property** ....................................... 269

A. Antitrust Statutes and Acquisitions of Intellectual Property ........................................... 269
   1. Overview of Section 7 of the Clayton Act ................................................................. 269
   2. Acquisition of Patents ................................................................................................. 271
      a. Internally Developed Patents .................................................................................. 273
      b. Purchase of Patents ................................................................................................. 274

Chapter VI
Counseling Guidelines for the Licensing of
Intellectual Property ................................................................... 355
A. Identifying and Understanding the Nature of the
   Restriction ............................................................................... 358
B. Characterizing the Licensing Relationship ............................. 360
   1. The Impact of Characterization on Antitrust
      Analysis ............................................................................ 360
   2. Distinguishing between Horizontal and Vertical
      Licenses ................................................................................ 361
      a. Vertical Relationships ................................................ 361
      b. Horizontal Relationships .......................................... 362
      c. Superior and blocking technologies ........................... 362
   3. Questions a Counselor Must Ask When
      Characterizing the Relationship ....................................... 363
      a. Are the Technologies Substitutes? ............................. 363
      b. Is One Technology Vastly Superior? ......................... 364
      c. Do the Parties Own Blocking Positions? ................... 364
C. Market Power within a Relevant Market ................................ 365
   1. 1995 IP Guidelines Approach to Defining Market
      Power ................................................................................ 365
   2. Three Possible Relevant Markets ..................................... 365
      a. What is a Technology Market? .................................. 366
      b. What is an Innovation Market? .................................. 367
   3. Counseling Questions Regarding the Determination
      of Market Power ............................................................... 368
      a. Which Market Should Be Analyzed? ......................... 368
      b. What are the Boundaries of the Relevant
         Market? ........................................................................ 369
      c. What are the Parties’ Market Shares? ....................... 369
      d. Do the Parties Have Market Power? .......................... 370
      e. What are Entry Conditions? ..................................... 370
D. The Applicable Antitrust Standard ......................................... 371
1. Per se Violations—Market Power Irrelevant .......................... 371
2. Rule of Reason—Market Power Matters ............................ 372
3. Safe Harbors .................................................................. 373
   a. Prohibition of Agreements Restricting Competition—Article 101 .................................. 375
      (1) Does the license agreement restrict actual or potential competition that would have existed without the contemplated agreement? .......................................................... 376
      (2) Does the agreement restrict actual or potential competition that would have existed in the absence of the contractual restraint(s)? .......................................................... 376
   b. Block Exemption for Technology Transfer Agreements .................................................................. 377
   c. Article 101(3) Exemption .............................................. 378
E. Business Justifications Underlying Restrictions ................................................................. 378
F. Analyzing Particular Licensing Practices ................................................................. 381
   1. Royalties ........................................................................ 381
      a. Are Royalties Potentially Tied to Goods That Do Not Use the Licensed Technology? .......... 382
      b. Are Royalties Based on the Total Sale Price of a Finished Good? ........................................ 383
      c. Are Royalties Being Charged on Invalid or Expired Intellectual Property? ......................... 383
      d. Are Royalties Being Charged Worldwide on Intellectual Property Rights that are Enforceable in Limited Jurisdictions? ................................................................. 385
      e. Does the Arrangement Qualify as a Reach-Through License Agreement? ............................ 385
      f. Do the Royalty Rates Differ by Licensee? ............................................................................. 386
      g. Are Royalties Shared with Sub-Licensees? ........................................................................... 386
      h. Are There Information Firewalls When Accounting for Royalties Owed by a Competitor? ................................................................. 387
      i. Do the Parties Contemplate Changing Their Royalty Rates Throughout the Relationship? ........ 387
   2. Resale Price Maintenance .................................................. 388
   3. Nonprice Restrictions ....................................................... 391
