iv  Distributed Generation Law

3.3 Promoting DG in Different U.S. Jurisdictions  80
3.4 Conclusion  89

4  State Highlights  91
4.1 New York  92
4.2 California  102
4.3 Illinois  117
4.4 Hawaii  127
4.5 Minnesota  135

5  The Economics of Distributed Generation  147
5.1 Introduction  147
5.2 Valuation of DG  149
5.3 System-wide DG Considerations  158
5.4 Utility Purchased Power Agreements  167
5.5 DG and Evolving Grid Architecture  168
5.6 Conclusion  172

6  Project Siting, Permitting, and Environmental Issues  173
6.1 How Do I Assess the Suitability of a Site for Project Development?  174
6.2 What Permits and Approvals Do I Need for My Project?  178
6.3 What Are the Potential Barriers to Project Completion and How Can They Be Overcome?  184
6.4 Conclusion  192

7  Financing Energy Projects  193
7.1 The Opportunities and Challenges to Financing Distributed Generation Projects  193
7.2 The Securitization of Portfolios of Distributed Generation Assets  200

8  Privacy and Cybersecurity  213
8.1 Introduction  213
8.2 What Is the Risk? Privacy and Cybersecurity Is a Growing Concern, Particularly for DERs  214
8.3 State Regulation  217
8.4 Federal Influence  222
8.5 Conclusion  227
9 Energy Storage in Distributed Generation 229
  9.1 Introduction 229
  9.2 Energy Storage Technologies 230
  9.3 Site Control and Permitting 233
  9.4 Interconnection 233
  9.5 Installing the Energy Storage System 235
  9.6 Energy Storage Agreements 240
  9.7 Energy Storage Policy and Legal Developments
    in California, Massachusetts, and New York 251

10 The Present and Future of Electric Vehicle
    Charging Stations 265
  10.1 Introduction 265
  10.2 States in Which No Action Has Been Taken Yet 268
  10.3 States in Which Utilities May Invest in EV
    Charging Stations 270
  10.4 States in Which EV Service Providers
    Are Exempt from Traditional Public Utility Regulations 275
  10.5 Regulations Similar to Those Governing the Sale of Motor Fuel Should Not Be
    Applied in the EV Charging Station Context 278
  10.6 Conclusion 281

11 Climate Change, Paris Agreement,
    and International Obligation 283
  11.1 Introduction 283
  11.2 Defining the Goal 286
  11.3 International Policies and Programs 292
  11.4 Measuring the Carbon Reduction Benefit from DG 302
  11.5 Conclusion 309

12 Mission Essential: Energy Resilience
    for the U.S. Department of Defense 311
  12.1 Introduction 311
  12.2 Installation Energy Management Structure 316
  12.3 Distributed Generation in the DoD: Energy Efficiency and Renewable Energy Policies and
    Outcomes 319
### Distributed Generation Law

| 12.4 | Enhance Energy Resilience | 325 |
| 12.5 | Financing and Contracting Distributed Generation for Energy Resilience | 335 |
| 12.6 | Conclusion | 352 |

### The Law of Distributed Generation In the United States—Conclusions

| 13.1 | California Wildfires | 353 |
| 13.2 | Diesel Generators | 355 |
| 13.3 | Carbon-Free Distributed Generation Solutions | 359 |
| 13.4 | Microgrids | 362 |
| 13.5 | Attacks to the Grid | 366 |
| 13.6 | Conclusion | 369 |
