COMMITTEE OPERATIONS
MISSION STATEMENT

Committee Operations supports the work of all of the Section's substantive Section Committees by providing guidance, oversight and coordination so that the work of the committees best supports and furthers the mission of the Section to be the world's preeminent competition and consumer protection organization. Committee Operations acts as a principal resource to committee leadership aiding them in developing and implementing their long and short term plans, creating and delivering timely and informative programming, authoring Section-quality publications and providing cutting edge and real time information to their members, recruiting and integrating new members, including younger practitioners, and furthering the Section's diversity goals. Each member of the Committee Operations team is assigned to be the primary resource for select committees, regularly communicates with committee leadership, provides evaluations and feedback to the Section's Council and officers, and drives innovation throughout the committee structure. The Section's Committee Officer oversees the Committee Operations team and plays an integral role in all of its work.
