20.5 million Americans age 12 or older had a substance use disorder in 2015. Less than 10% received any treatment.

- 88,000+ alcohol-related deaths
- 52,000+ lethal drug overdoses
- 480,000+ deaths from cigarettes

*National Institute on Alcohol Abuse and Alcoholism, ASAM Opioid Addiction 2016 Facts & Figures, CDC Tobacco-Related Mortality*

There are FDA-approved medications available to treat substance use disorders. These medications can be used alongside counseling and other support.

Stigma decreases access to care.
