Safeguarding the Bioeconomy: Challenges to Data Security, Health, the Economy, and National Security

In a world of open source DNA sequences, the potential for great discoveries in biology is nearly limitless, but so it the potential for serious exploitation. Special Agent You and the Biological Countermeasures Unit of the FBI are working to evaluate possible threats posed by advancing science. His presentation will address the ways in which understanding and advancing biological science is a critical part of the economy, our data landscape and national security.
