Data Source: American Bar Association's National Lawyer Population Survey

\* Individual state bar associations or licensing agencies are asked to provide demographics data for resident and active attorneys as of December 31st of the prior year, e.g. 2020 data is as of 12/31/2019. The numbers reflected here are the best available data provided to us from the respective associations or agencies.

Notes: In 2018, Indiana corrected the resident active figures for 2016; this report has been updated to reflect the new total attorney count for 2016 than was previously reported. In 2019, Maryland, Nevada, and New York provided corrected 2018 lawyer counts; this report reflects the corrected 2018 total attorney count.

- (1) Beginning with the 2016 survey, choices included "Multiracial" as an option for race/ethnicity and "Other" as an option for gender.
- (2) Race/ethnicity percentages may total to more than 100% as many states allow responders to choose more than one option for race/ethnicity.

Beginning with the 2020 survey, two new questions about attorneys who identify as LGBTQ+ and as persons with a disability were asked. Results are not included in the 2020 report due to insufficient response.
