

# Reinventing the Practice of Law:

## A Program on Alternative Models of Providing Legal Services

In today's law practice, you may never meet your clients face-to-face or handle every aspect of the case. You do not need the mahogany desk and the office with diploma-lined walls. Your clients may not be able to hire you to help them solve every part of their legal problem.

Increasingly the practice of law includes virtual law offices that provide unbundled legal services through client portals and niche law practices that allow attorneys to combine their passions with their client's needs.

The future of solo and small firm law practice is explored by national experts who are reinventing the practice of law. Join us for a lively discussion about current trends and future opportunities.
