All in the Family: Seamless Workflows from Mac to iOS

Brett Burney and David Sparks

Who Are These People?

David Sparks
iCloud

For safekeeping. And easy sharing.

Cloud securely and safely stores your photos, videos, documents, apps, and more — and keeps them updated across all your devices. So you always have access to what you want, whenever you want it.

- Photo Library
- Photo Stream
- Drive
- Backup and Restore
- Family Sharing
- Back to My Mac
- Email, Calendar, Contacts
- Reminders
- Find My iPhone / iPad / Mac
- Find My Friends
- Keychain
- iWork
- www.icloud.com

Continuity

All your devices. One seamless experience.

When you use a Mac or any other Apple device, you're able to do incredible things. And when you use them together, you can do so much more. Make and receive phone calls without picking up your iPhone. Edit a document on one device and pick up where you left off on another. Automatically unlock your Mac when you're washing your Apple Watch. And copy and paste images, videos, and text from your iOS device to your nearby Mac, or vice versa.
PDF Workflow

1. Save PDF files to Dropbox
2. Sync the Dropbox folder in PDF Expert
3. Create a separate copy if desired
4. Open the PDF and highlight, underline, and generally markup as necessary
5. Ensure it’s saved back to Synced Folder so that it gets updated to Dropbox
Mind Mapping

"Go home hippie!"
What is a MindMap?

What about Apps?
Outlining

OmniOutliner
Writing

We all write …
Word Workflow

1. Save Word files to Dropbox or OneNote
2. EITHER open Dropbox/OneNote app or Word app to access document
3. Edit your document on the iPad
4. When you’re done tap the exit / left arrow button
5. Word will automatically upload your edits back to Dropbox/OneNote where you can access on your Mac

Text Buckets = Good
‣ Will work fine with Dropbox but iCloud is superior here.
‣ I start on my Mac and store the Keynote in iCloud Drive > Keynote
‣ When I pick up my iPad, the presentation is synced to the Keynote app

Dictation

Siri vs. Dragon
One Automation to Rule them All
Thanks
