To uncover the messages and phrases that work to encourage planned & major gifts
Philanthropy as synthetic family

Philanthropy is a SOCIAL act using the mechanisms of FAMILY bonding
Philanthropy uses family bonding mechanisms

• Charitable giving is rewarding (like receiving money)

• But uniquely involves oxytocin-rich social attachment brain regions (used in maternal and romantic love)

“donating to societal causes recruited two types of reward systems: the VTA–striatum mesolimbic network, which also was involved in pure monetary rewards, and the subgenual area, which was specific for donations and plays key roles in social attachment and affiliative reward mechanisms in humans and other animals.” Moll, et al (2006) PNAS 103(42), p. 156234.
Philanthropy uses family bonding mechanisms

Increasing neuropeptide "oxytocin" – a family bonding hormone – increases giving

Human touch, when followed by a small gift, elevated oxytocin levels AND subsequent charitable giving.

Philanthropy uses family bonding mechanisms.
Charitable estate giving as "synthetic family"

The strongest predictor of charitable bequest planning is childlessness

Charitable giving generated greater activation in brain reward centers (ventral striatum) when observers were present.

If you were asked in the next 3 months, what is the likelihood that you might GIVE money to ______?

Rate the likelihood from 0 to 100
0 – Absolutely no possibility under any circumstance
10 – Extremely highly unlikely
20 – Highly unlikely
30 – Somewhat unlikely
40 – Slightly more unlikely than likely

v.

If you signed a will in the next 3 months, what is the likelihood you might leave a BEQUEST gift to ______?

50 – 50-50 chance
60 – Slightly more likely than unlikely
70 – Somewhat likely
80 – Highly likely
90 – Extremely highly likely
100 – Absolutely certain without any possible doubt

• Tell as many **life stories** of living planned donors in as many places as possible

• This helps to set a social norm by example using appropriate language

**Philanthropy is a SOCIAL act using the mechanisms of FAMILY bonding**

• START with the donor’s life story, not the charity’s immediate need
• Ask about family connections to the cause
• Share the option of honoring a family member by making a tribute gift to charity in the will

Do we communicate with donor language or insider language?
• Use family words (stories and simple words) not formal words
• Use social examples/norms
• Tell life stories of planned donors
• Talk about benefits – in the right way
• Ask about family connections to the cause and give the option of a tribute gift in the will
• Communicate obliquely (use non-death-related packaging)
• Keep communicating to older donors to be top of the mind at the point of decision.
