Litigation Support Software Comparison Chart

Litigation support software is designed to aid lawyers in the process of litigation, and generally includes databases for organizing, searching, and reviewing discovery material including deposition transcripts, produced documents, and correspondence. The comparison chart below includes information on features of several brands of litigation support software. As vendors may offer other packages, please check each vendor's website for additional details and contact information. The information in this chart originates from the vendors, is not a comprehensive review of litigation support software, and does not constitute endorsements of any kind.

Product name	General description/overview	Target firm size range/Minimum # of licenses/Product Pricing	Technical Support	Compatible file types and processing	Viewing, annotating, and organization	Presentation features	Operating System compatibility and networking	Searching and language support	Database information/Videos, demos, tour/free trial versions
CaseLogistix	CaseLogistix enables legal teams to review, analyze, and produce digital evidence. -Available on your desktop, on your network, or on the Web -Designed for early case review through complex litigation -Combines a simple, configurable user interface and comprehensive review capabilities -Unicode compliant and is able to recognize all foreign language character sets -Other Anacomp Litigation Support Services include Hosted CaseLogistix, Preservation, Collection, Processing, and Production Services	CaseLogistix: AMLaw100 to smaller boutique litigation firms, Fortune 500 to medium-size corporations No minimum number of licenses. Contact Anacomp for quote at Sales: (877)285-3883 Email: sales @anacomp.com	CaseLogistix: Different price plans, ranging from business hours, 24*7 support, to dedicated on-site support, and dedicated project management -Quick Start Program offers fixed price service programs designed to quickly help begin a software platform deployment project. Contact Anacomp for Quote at Sales: (877)285-3883 Email: sales @anacomp.com	CaseLogistix: Review single and multi-page images such as TIFFs, "near-native" formats (e.g. PDF and HTML), or documents in original, unaltered native format (e.g. email, Web/XML, MS Word, Excel, PowerPoint, and even voice and video). "TIFFING" conversion can be skipped until the end of the discovery process, and only then as needed to format documents that are relevant and required for production. This true Native review capability allows reviewers to review hidden context in formulas, notes, and track changes, therefore increases review accuracy.	CaseLogistix: -Outlook-like interface -IntelliFolders(TM) automatically categorize documents by custodians, dates, and or other criteria in a hierarchical 'tree' -Customized Workflow for multiple reviewers and custom reporting -Configurable UI -Drag and drop major transcript file formats such as .TRN, .ASCII, and .PTF and they are converted on the fly for redacting, annotating, etc. -Auditing capabilities based on its SQL structure, changes to records are tracked, etc.	CaseLogistix: "Send-to-Casemap" integration for evidence organization pulls facts, issues, and documents of any cases from CaseLogistix and sends them to CaseMap. Allows users to produce reports, lists and motions for summary judgment.	Caselogistix: CaseLogistix On-premise is compatible with Windows XP CaseLogistix On-Demand or hosted CaseLogistix is available online through web browsers CaseLogistix may be deployed in variety of architecture, from a single-server/ laptop deployment, up to multi-tier multi-server deployment. Roll out can be directly through desktop via Citrix, and/ or via the web. Anacomp also offers CaseLogistix as an on-premise and/or on-demand platform.	Caselogistix: -Search options: The document text search can be configured with a variety of options including Stemming (-ing, -ed), Fuzzy Search, synonym, Boolean, and Phonic Searching -Persisted search hit highlighting: Users have the ability to import a word list and CaseLogistix will highlight the key terms within the database, even as you review the documents. Supports multiple highlight colors to differentiate your key term categories. -Multilingual/Unicode support: CaseLogistix is fully Unicode supporting, allowing global review of any documents. Allows display of translated and original documents side-by-side. Searching can be done in English as well as foreign characters, with search hit highlighting. Out-of-the-box desktop localization for US, UK, English, Spanish, and Serbo-Croatian further enhances global review of documents. -Advanced search: Users can create unlimited searches with multiple criteria. These searches can be named so they can be performed again or modified later.	Database: CaseLogistix On-premise requires SQL Server Videos, demos, tour/free trial versions: Flash Demo Request a Live Demo For free evaluation of the software, contact Anacomp at Sales: (877) 285-3883 Email: sales@anacomp.com

Lexbe	Lexbe is a web-based litigation support and document management application. Document management features include full-text indexed search, automatic optical character recognition (OCR) of PDF files, document sorting, retrieval and repository, native file review, metadata analysis, document coding and off-line access. Case analysis features include fact and issue analysis, case calendaring, tracking of case participants, deposition analysis, case research, fact tracking and dynamic chronology/timeline generation. Litigation production tools include relevancy and privilege coding, Bates stamping, and automatic privilege log generation.	Lexbe: All sizes The Base Plan includes 2 users, 1GB of shared storage, and costs $99/month. The Law Firm Plan includes 10 users, 10GB of shared storage, and costs $249/month. Under either plan, additional user licenses are available for $50/month and additional storage is available for $15/GB. See: Pricing info	Lexbe: Support and training are included at no additional charge.	Lexbe: Any document or video file type can be added. Over 100 text-based files types are indexed for search, including PDF, Word, Excel, WordPerfect, Outlook and other email formats. Graphics files like JPG, TIFF, PNG, and BMP are supported and viewable within Lexbe. Native file review is supported. See: file support information	Lexbe is web-based and contains an integrated document viewer inside a browse window. PDF documents are shown in the familiar Acrobat reader. Each document can be annotated with dozens of fields including descriptions, notes and case facts. Facts and issues are tracked through a dynamic chronology/timeline generation. Depositions, transcripts and other documents can be summarized within Lexbe. Customizable reports can be downloaded to Word, WordPerfect or Excel.	Lexbe: Documents, images and video can be linked to outlines of facts. Files can be exported to the desktop and linked to an automatically-generated spreadsheet that includes document name, Bates number and other metadata. All documents can be searched, annotated and organized on the fly.	Lexbe is online/SaaS based and will work with any operating system and a current web browser, including Windows, Mac and Linux. Lexbe is web-based so no local servers or software are needed.	Indexed search includes full text from documents, document metadata and associated database descriptions. Search options include partial word match, exact phrase match, fuzzy search (tolerant of OCR errors), concept search and Boolean search. Search engine returns hits highlighted with surrounding text. Unicode and foreign languages are partially supported for search, indexing and viewing. See: Unicode support information	Lexbe is completely web-based, no client-side database or software is needed, other than a current web browser. Clients can also download and maintain a local version of documents, files and information as part of a briefcase function. 5-minute overview of Lexbe Web-demo Fully functional 30-day free trial
