Crafting Effective Settlement Agreements, co-published by the ABA Business Law and Dispute Resolution Sections, provides practical advice on drafting settlement terms, reviewing proposed boilerplate provisions, identifying win-win nonmonetary terms even in “money only” cases, and ensuring both the durability and enforceability of settlements.

This desk reference provides comprehensive and practical guidance for attorneys regardless of whether the case has not yet been filed or already resulted in a jury verdict. Mediators too will find this a relevant and insightful resource for the process of facilitating a finalized settlement agreement. Go to ShopABA.org for more information and to purchase.
