GENERAL GUIDE TO FORMATTING AND CITATIONS FOR
ANTITRUST LAW JOURNAL SUBMISSIONS

Submissions should be made as a Word file with the author name and affiliation (in a bio note indicated by an asterisk) included. Because so many authors have already circulated earlier versions of their work or posted it on SSRN, refereed submissions are not sent anonymously to our reviewers.

I. ARTICLE CONTENT

The Antitrust Law Journal welcomes submission of original articles not previously published elsewhere on significant current issues of antitrust and consumer protection law. Comments, replies, and essays are also considered for publication both in the print and online editions.

II. ARTICLE LENGTH

The typical word counts for our articles run from 7500 to 25,000 words, including footnotes and citations. The maximum length we accept is 75 pages, double-spaced, Times Roman 12-point font with normal margins.

III. FORMATTING STYLE

1. We do not use a section title/heading for “Introduction.”
2. In numbering footnotes, the bio and acknowledgments note is indicated with an asterisk (*); it is not note 1.
3. Indent each paragraph; no extra spacing between paragraphs.
4. Double space the text in Times Roman 12 point.
5. For numbers between from zero to ten, spell out; otherwise use Arabic numerals. The exception is when presenting or referring to a percentage. In that case use an Arabic numeral.
6. In making cross-references to other places in the article, we use “part” rather than “section” to refer to other locations in the article: e.g., “As discussed above in Part II.C. . . .”

IV. CITATIONS

1. All cites and footnotes should be formatted in accordance with The Bluebook: A Uniform System of Citation (20th edition).
2. All quotes should have a footnote with the source cited (including the exact page).
3. All cites to articles and books should be to the most current edition or the published version (as opposed to the working paper/pre-publication version of an article).
4. Case citations do not use supra and infra cite forms.
5. For supra and infra cites (for articles, books, reports, etc.), use the cross-referencing tool in Word to allow for auto updating if additional footnotes are added or deleted during the editing process.
