

## HELP THE FORUM WITH ITS WEBSITE

The Forum on Communications Law is in the process of building its World Wide Web Site, which we hope to make into a repository of valuable information for communications lawyers, a good starting point for research on current issues in communications law (including pointers to statutes, pending bills, governmental agencies, public interest groups, trade organizations, and others), and a method for communicating with other forum members. As the site develops, we plan to add articles, model contracts, check lists, list serves, discussion groups, and question areas to share ideas and knowledge.

If you want to be involved, contact Jerry Birenz, (212) 381-7057 (phone), (212) 381-7233 (fax), or [jbirenz@sbandg.com](mailto:jbirenz@sbandg.com) (please put Forum website in the subject line) Technical knowledge is not necessary although it is welcome.

Check out the site at [www.abanet.org/forums/communication/home.html](http://www.abanet.org/forums/communication/home.html).

We are now in the process of building links to third party resources, and will be adding valuable links as we go along. Also, if your firm's website has substantive information of value to forum members and you would like the site to be included in the site's links section, please notify Forum Manager Teresa Ucok, (312) 988-5658 (phone); (312) 988-5677 (fax); [tucok@staff.abanet.org](mailto:tucok@staff.abanet.org).
