

Committees Meet in San Diego to Plan Association Year

The Section's substantive committees met during the Fall CLE Conference to map their priorities and plan their projects for the upcoming association year. In addition to submitting CLE program proposals to be presented at upcoming conferences, section committees will be busy disseminating information on relevant cases and practice trends over their respective list serves and populating the Section's On Line Resource Center.

Section committees plan to embark on numerous projects that will benefit members of the Section of Family Law. Some of these projects include the Marital Property Committee's plan to compile and on-line version of marital property law in the 50 states; the Alternative Families Committee's plan to start dialogue with legislators regarding alternative families; and the Reproductive Technologies Committee's goal to Complete Proposed Model Act on Governing Assisted Reproduction.
